

PRODUCT CATALOG 2023

+ A LITTLE EXTRA

Plus, a word derived from Latin, meaning 'more'. Ever since Elvedes was founded, we have always been striving to do a little more. With the introduction of high steerers for mopeds in the sixties, the existing moped cables needed some more length. The demand caused Elvedes to add more different cables to the range, not only for mopeds and bicycles, but for all kinds of purposes, made to measure.

Through the years, more and more of bicycle service parts have been added to the range. Convenient displays for more overview and an organized workshop. Disc brake pads, but more than just the most common ones. Rim brake pads, but also with special compounds

which are more silent and more powerful. Twist fit bottom brackets, which not only add more stability to the bearings, but are also more durable because the bearings themselves can be replaced when worn. And many more.

We think that these smart additions and solutions would make the life of the mechanic or consumer just that little more convenient. To put these items to everyone's attention some more, we introduce the Elvedes + label, by which they can easily be recognized throughout this catalog. The label, along with a single highlighted sentence, explains why that particular item is such a big plus.

Elvedes +

This label can be found at different items throughout the catalog. It tells you why this particular item is such a big plus.

since 1965! —

Lourens van der Spruijt, founder of Elvedes, registered his own business with the Chamber of Commerce on February 8, 1965. He kept his stock of moped parts, such as cables, sprockets, chains and pistons, under his bed and in his car. For several years he visited bike shops directly to make sales. Especially the demand for cables was remarkably high, and caused Lourens to start assembling brake, throttle clutch and speedometer cables at his mother's kitchen table.

Elvedes changed from a moped parts trading company into a control cable manufacturer for mopeds and bicycles. Sales shifted from shops to wholesale partners, who took care of the distribution of the aftermarket cables.

In 2002 it was time for Lourens to put the business in the hands of his twin sons, Carl and Peter, who would have Elvedes grow with a large expansion of product groups into an internationally known brand within the 20 years to come.

By focusing on updating and innovating a complete range of quality products, yet keeping the company feel as the accessible family business it still is, Elvedes aims to be a brand that can be trusted to always be of full service.

DISC BRAKE PAD GUIDE

HOW TO EXTEND THE LIFETIME OF YOUR DISC BRAKE PADS

Bed-in disc brake pads extend the life span of the pads considerably! Squeeze them in carefully and ensure that the pad just audibly touches the brake disc for approximately 100 metres at a speed of ± 25 km/hour. Now squeeze a little harder on the brake so that the speed decreases to approximately 5 km/hour, and then slowly increase the speed while gently squeezing the brake. Repeat this 10-12 times and the pads are worn in. Never brake to a stop with the brake still squeezed in order to prevent damage to the rotor. Always bed-in the front and rear brakes separately.

WHY ELVEDES DISC BRAKE PADS?

Elvedes believes that offering 3 different compounds can satisfy all riders in different circumstances with different bikes. Our compounds are compatible with all brands and types of stainless steel rotors on the market and will give you the brake power you will need. In the overview below, the performance of each compound is simply explained to easily make the right choice of disc brake pads.

ORGANIC (RESIN) COMPOUND

Excellent for gravel bikes, racing bikes and trekking bikes

METALLIC CARBON (SEMI-METAL) COMPOUND

Excellent for E-bikes, cargo bikes and delivery bikes

SINTERED (METAL) COMPOUND

Excellent for mountain bikes

ORDER QUANTITY

All organic, sintered and metallic carbon disc brake pads have a steel backplate.

XXXX -CARD

All disc brake pads can be ordered per card, containing 1 pair.

Necessary pins and clips included with all types of disc brake pads on card.

Fits Discovery display (page 82 - 83)

XXXX -BOX

Selected disc brake pads can be ordered per box, containing 10 pairs

Fits Padfinder display (page 81)

XXXX -BOX25

Selected disc brake pads can be ordered per box, containing 25 pairs.

Fits Padfinder display (page 81)

RIM BRAKE PAD GUIDE

☀️ BLACK COMPOUND

- For steel and aluminium rims
- Developed for dry conditions
- Excellent for city bike / trekking bike / racing bike

☁️ BLACK/RED COMPOUND

- For steel and aluminium rims
- Developed for wet conditions
- Excellent for MTB

☀️ ☁️ 📢 WHITE COMPOUND

- For steel and aluminium rims
- For more brake power
- Developed for dry and wet conditions
- Excellent for E-bike / racing bike / BMX

WHITE COMPOUND

This brake pad is specially developed for comfortable, powerful braking. Its unique white compound is silent and doesn't contaminate the rims with black residue.

☀️ ☁️ BLUE COMPOUND

- For carbon rims only
- Developed for dry and wet conditions
- Excellent for racing bike / BMX

How to replace
V-brake pads

ORDER QUANTITY

XXXX -CARD

All rim brake pads can be ordered per card, containing 1 pair.

XXXX -BOX

Select rim brake pads can be ordered per box, containing 25 pairs.

Fits Caddy display (page 80)

VOLUME BOX

All Elvedes outer cables have MoS₂ enriched liner for lower friction and higher performance.

The outer cable volume boxes come with an easy pull reel made of 100% recycled and 100% recyclable plastic.

The boxes are also equipped with a unique GripClip, which prevents the outer cable from slipping back into the box after cutting.

Fits Boxer display (page 78)

The cable type is indicated by the letter A, B, C or D

HYDRO HOSE VOLUME BOX

20 meters hose

Fits Elvedes parts only

Fits Boxer display (page 78)

2012030 Black

2012031 White

VOLUME BOX

Elvedes hydro hose is reinforced with a Kevlar housing and has a PTFE liner, which makes it suitable for both mineral oil and DOT fluid. The hydro hose volume boxes come with an easy pull reel made of 100% recycled and 100% recyclable plastic. The boxes are also equipped with a unique GripClip, which prevents the hose from slipping back into the box after cutting.

ROTATION

BEARINGS

All Elvedes bearings are produced complying to ABEC 3.
All Elvedes bearings are provided with extra grease for higher durability and performance.

INDUSTRIAL BEARING

- Balls separated by cage
- For full rotation parts
- ABEC 3

MAX BEARING

- Max amount of balls
- For minimum rotation parts
- For heavy loads
- ABEC 3

PULLEY WHEELS

All pulley wheel bearings are produced complying with ABEC 3 or ABEC 5
All pulley wheel bearings are provided with extra grease for higher durability and performance.

2 × 10 TEETH

CP2017231

ABEC 3 with extra grease
1 set
Stainless sealed bearing

Including spacers compatible with:
A - Shimano 8 speed
B - Shimano 7 speed, Campagnolo 8 speed
C - Campagnolo 9 / 10 speed
D - SRAM (one hole upper pulley) 9.0SL ('98) / 9.0 ('97 - '98) / 7.0 ('97 - '98) / 5.0 ('98 - '99)"

2 × 11 TEETH

ABEC 5 with extra grease
1 set
Narrow / wide
Stainless sealed bearing

Compatible with:
SRAM Eagle XX1 / X01 / NX / SX / GX 1×12 speed
and 2×11 speed MTB

2 × 12 TEETH

2020097

ABEC 5 with extra grease
1 set
Narrow / wide
Ceramic hybrid bearing

Compatible with:
SRAM Force / Red eTap AXS

12 + 14 TEETH

2020098

ABEC 5 with extra grease
1 set
Narrow / wide
Ceramic hybrid bearing

Upgrade for:
SRAM Force / Red eTap AXS

BOTTOM BRACKET GUIDE —

GET STARTED

A bottom bracket shell can be threaded or non-threaded, called thread fit and press fit respectively. It is important to know which type of shell you're working with and what the shell diameter and width are, in order to select a fitting bottom bracket.

The most common thread types in thread fit shells are BSA (English thread), ITA (Italian thread) and T47 (M47×1). A thread type bottom bracket is interlocked directly with the shell. Press fit shells come in various diameters and widths, most commonly PF30 (Ø46mm), BB30 (Ø42mm) and BB86/92 (Ø41mm). Press fit bottom brackets are pressed into the shell using a press-in tool.

Another dimension you need to know in order to select a fitting bottom bracket is the spindle

diameter. Different brands and models can vary widely, from Ø30mm to tapered versions like Praxis (Ø30mm – Ø28mm). Differences between brands can also be as little as a few hundreds of millimeters.

Elvedes offers a basic range of bottom brackets, which can be easily adapted to specific types of spindles such as FSA Mega Exo and SRAM / Truvativ GXP using specific bearing caps or reducer kits.

Knowing all three dimensions, the guide on pages 62 – 64 can be used to select the perfectly fitting bottom bracket.

TWIST FIT

Tools required: 2018086 Bottom bracket wrench

¹ Convertible to GXP with GXP reducer kit (2018080)

² Convertible to FSA with FSA bearing caps (page 69)

LOW MAINTENANCE COSTS

Only the bearings can be replaced for service maintenance, while the bracket stays in place.

PERFECTLY IN LINE

The threaded interlocking cups allow the spindle to run freely without squeaking and creaking.

EASY INSTALLATION
